fungicide
application

other alerts:

- **Season's first disease forecast alert.**>
 - **Weather data, which is necessary for Blitecast to function correctly, is missing.** Please consult reports for alternative weather stations. If you need additional help, please send email to Laura Joseph, lje5@cornell.edu
-

Blitecast rules:

- season severity of 18 identifies need for the first fungicide application.
 - an accumulated severity value of 7 after a fungicide application identifies the need for a subsequent fungicide application
-
